

**We go the  
extra mile.**

---

## Who we are

**From our very first transport in 2017, Load Master has been delivering reliable and cost-effective transport solutions across New South Wales.**

Specialising in bulk haulage, disposal and recycling for civil, industrial and mining projects, we have become the number one choice for some of the biggest companies in the country.

Our modern fleet, combined with our highly experienced heavy vehicle drivers who are all trained and verified, allows us to handle a wide range of transport requirements, no matter how big or small.

NHVAS accredited in Mass, Maintenance and Fatigue management, Load Master is your trusted partner when it comes to delivering the goods.

**All day, every day, we go the extra mile.**

---

## Who we work

---

## Why choose us?

### **We prioritise safety**

All our drivers are trained in Fatigue Management, Chain of Responsibility and are independently assessed and given a Verification of Competence. This ensures both a safe working environment, and that your product is delivered.

### **We respond 24/7**

Transport isn't a 9 to 5 job. We understand how important your order is, so we offer round-the-clock communication to put your mind at ease. Enjoy real people offering first-class customer support.

### **We keep our word**

Our experience ensures we're on time and on budget, every time. Our processes ensure an unmatched level of consistency across all types of loads, providing peace of mind that the job gets done.

### **We have the fleet**

Load Master has an extensive modern fleet of PBS rated vehicles that offer payloads of up to 40 tonnes. This means our customers receive cost effective transport solutions in large volumes and at the highest standard.

# What we Haul

## Bulk Transport & Haulage

---

- Whether the load you need delivered consists of quarry products or waste disposal, Load Master has the necessary bulk transport service to suit all projects. We have extensive experience in the bulk movement of materials as well as the processes used to transport and dispose of materials.
- Thanks to our well-maintained, modern fleet and equipment no project is too far, no job too small. We truly understand the importance of transporting your load to site on time no matter the distance.

## Quarry Products

---

- Load Master has unmatched expertise when it comes to quarry product supply and delivery as part of our bulk haulage services. We can supply soil, sand and gravel quickly and safely to and from site. We also work across various sectors such as industrial, civil, and mining.

## Waste Disposal

---

- Load Master specialises in the management of contaminated soils and provides a range of delivery and disposal options for the following products:

### ASBESTOS

- We are specialist operators in ACM - Asbestos Containing Material - disposal as well as Mixed Asbestos Waste disposal

### CONCRETE & ASPHALT

- We utilise an extensive network of recycling facilities across the Sydney region which crush concrete for re use in construction materials.

### GSW

- We dispose of General Solid Waste that includes Recyclable, Landfill, Restricted & Hazardous materials.

### VENM & ENM

- We have extensive experience in prompt bulk disposal of Virgin Excavated Natural Material & Excavated Natural Material.

Our modern fleet of heavy haulage equipment allows us to customise our services for the job at hand. At Load Master, we have a high quality and well-maintained fleet of PBS rated vehicles and plant available for your next project.

## Putting safety first.

**At Load Master we're committed to providing and maintaining a safe and healthy working environment for all people at our workplace. This is the foundation of our success.**

As part of this commitment to occupational health and safety, we will:

- Comply with all applicable legislative occupational health and safety obligations.
- Implement a Safety Management System that is commensurate with the nature of our undertakings and minimizes or eliminates health and safety risk at the workplace.
- Identify and establish health and safety objectives, targets, and strategies.
- Provide appropriate physical and financial resources necessary for the implementation, maintenance, and adherence to our Safety Management System.
- Ensure that all workers receive instruction, training, and supervision appropriate to their duties, skills and level of accountability.
- Ensure that all personnel who are responsible for the implementation and maintenance of our Safety Management System are appropriately trained.
- Establish and promote worker consultation throughout the workplace via the establishment of OH&S Committees and Safety Representatives.
- Encourage workers to participate in risk management and safety awareness programs relevant to the workplace; and
- Facilitate the expeditious return to work for workers who are injured.

---

## Our Team

### **Passionate and professional leadership.**

Load Master Management are a team of experienced transport professionals dedicated to taking bulk-haulage to a whole new level.

### **Qualified and verified drivers.**

From independent assessments to the latest driver training in fatigue management and GPS tracking, you can be sure your Load Master driver is highly qualified and truly dedicated to delivering your load.
